

## *About UPHP*

- ▶ UPHP became a health plan for Upper Peninsula residents on August 1, **1998**, when we partnered with 300 medical providers, 15 hospitals, and clinics in every Upper Peninsula county. The office staff in Marquette was small, starting with 6 employees. UPHP started managing the health care of **1,900** enrolled members.
- ▶ **Today**, the network exceeds 800 providers, the staff has increased to 40+ employees, and enrollment has increased to more than **26,000** Medicaid and MICHild members.
- ▶ Our success has provided employment, wages, and benefits for a talented segment of the Marquette County community. The staff has contributed time and resources to many regional and national charitable events.
- ▶ Thousands of Upper Peninsula residents get care from the UPHP network via commercial insurance—often offered by their employers. UPHP serves as the hub for all commercial managed-care and preferred provider organization (PPO) activity in the Upper Peninsula.
